

90° angle EUROKONUS connector

The 90° Angle EUROKONUS Connector facilitates secure and efficient wall pipe connections for the iVector S2 models. Made from high-quality materials, it is designed for use with flow valves and ensures robust, reliable performance. This space-saving elbow connector is essential for any heating system where wall connections are necessary, providing enhanced compatibility and easy installation. It is an indispensable component for maintaining the efficiency and reliability of your heating system.
