

Drain Off Tail

The Myson Drain Off Tail is a crucial accessory for radiator heating systems, facilitating efficient draining of both individual radiators and entire systems. Designed to be used with MatchMate and MatchMaster radiator valves, it integrates seamlessly and ensures reliable operation. Featuring a durable chrome finish, it not only enhances durability but also provides an attractive appearance. Ideal for domestic heating systems, it supports 10 bar (compression) and 3 bar (pushfit) operating pressures, with an operating temperature of up to 120°C (compression) and 92°C (pushfit).
