

Electric Underfloor

Myson Electric Underfloor Heating is a comprehensive one-box solution designed for easy installation in small, hard-to-heat areas like kitchens, bathrooms, and conservatories. Ideal for renovations, self-builds, and extensions, this system includes an electric mat, digital clock thermostat, control card, floor sensor, sensor tube, multimeter, and installation manual. Rated at 150W/m², it offers quick heat-up times and is suitable for tile, stone, or wood flooring. The product carries a CE mark, conforms to ISO 9001:2015 standards, and includes a 10-year guarantee for the mat and a 2-year guarantee for the thermostat and sensor. Produced under the Low Voltage Directive 2014/35/EU, it offers safe, efficient, and flexible heating options.
