Cliprail

Myson Cliprail is a reliable and efficient system for attaching underfloor heating pipes to floor insulation. It features robust 1m U-shaped channels with fixing positions every 50mm, suitable for both traditional and liquid screeds. The pipes are laid in a serpentine pattern, making the Cliprail ideal for various heating projects. Installation does not include floor insulation. The product is fast, cost-effective, and ensures secure pipe attachment, making it perfect for residential, commercial, and renovation projects involving underfloor heating.
