

## Tackernail

Myson Floortec Tackernails are the strongest plastic U-Clip solution for securing underfloor heating pipes to solid floors. They are designed to prevent clogging and lifting, enhancing the reliability of the heating system. The Tackernail system uses a Tackertool for easy and efficient installation, allowing for both spiral and serpentine pipe layouts. This setup provides a quick, secure, and user-friendly method for underfloor heating installations. Note: Floor insulation is not included. Suitable for residential and commercial applications.
