

## MPRTRF Relay

Myson MPRTRF Relay is a wireless programmable room thermostat designed for efficient energy usage. It uses Smart Start technology to adjust start-up times, offering significant savings on heating bills. The thermostat features three temperature settings: comfort, economy, and frost, and supports four programs (three pre-set, one adjustable) with manual override. Continually learns the temperature rise requirements and adjusts accordingly. It connects to 24V hard-wired centers and is compatible with Floortec underfloor heating systems. The IP30 rating ensures it's suitable for residential and commercial applications.
