

Electric Décor Vertical

Myson Electric Décor Vertical is a designer radiator with a stylish, contemporary design. This electric radiator is made from quality steel and features a vertical flat tube structure. It is perfect for domestic and commercial applications, especially in projects without gas or central heating. The unit includes a wireless electronic thermostat for precise temperature control. For extended functionality, an optional hard-wired, 4 zone touch screen programmer is available. This radiator is suitable for any space requiring a compact and efficient heating solution.
